

LEDsave
LEADER OF SAVING

COMPANY PROFILE

LEDsave (THAILAND) CO.,LTD manufactures and sells LED lighting in ASEAN. Originally, LEDsave was established in 2012 as joint venture between AMANO AND IMFAT. AMANO is a Japanese company developing industrial ventilation system, while IMFAT is a Thai company manufacturing electrical equipment for industrial use.

LEDsave aims to advance energy-saving technology and supports energy-saving policies for both public and private sectors. We continue to design and develop LED lighting technology to provide our customer with high-performance and durable products.

OUR VISION : "LEADER OF SAVING"

LEDsave strives to become the "Leader of Saving" by emphasizing on reduction of power consumption and environmental -friendly technology.

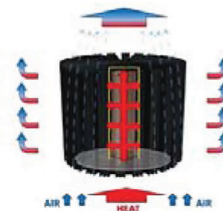

CITIZEN

The Best Quality of LED Lighting Innovation : High quality of LED chip

Together with Japanese manufacturers, LEDsave continues to research and develop our LED chips to ensure that they are of high quality and able to serve heavy duty purpose.

Our Mission : Supporting energy conservation projects

We put our effort to develop the technologies and give consultation on the topic of financial approval on energy conservation projects for private and industrial sectors.

Efficient Cooling System : Long life span

'Excellent Heat Sink' is high-performance cooling system created from copper and nanotechnology. This increases the efficiency of heat outflow which is two times faster than the general LED.

The Best Service : Provided by sophisticated lighting design

Apart from improving efficiency of LED, LEDsave also places an importance on providing high-quality service regarding lighting design and installation of lighting system (Dialux program).
